"I am an international student."

NOTABLE ACHIEVEMENTS

▶ Earned a Ph.D. in Computer Science from Florida International University (FIU)

▶ Led a team of graduate students working on the Florida Public Hurricane Loss Model, a hurricane catastrophe model developed to assess hurricane risks and quantify the cost benefits of hurricane preparedness

▶ Interned at the Volkswagen Research Lab in Silicon Valley, where an idea she proposed to apply a novel technology in artificial intelligence to self-driving cars led to a new patent application

▶ Research has been featured in 30 peer-reviewed journals and conferences and has been cited over 280 times by researchers worldwide

▶ Founding member of FIU's Computer Science Graduate Student Association

▶ Accepted a data science position with Microsoft Corporation's data science team in Seattle, Washington, where she will use machine learning and artificial intelligence to power data analyses
